

AFP SUSTAINABLE DESIGN SHEET: LUXURY VINYL TILE

SECTION I. PRODUCT IDENTIFICATION

Product Name: Armstrong™ Flooring Products
Description: Luxury Vinyl Tile (LVT)

operations, and to dispose of waste materials in an environmentally-responsible manner.

SECTION II. ENVIRONMENTAL POLICY

Key Requirements:

Our policy on the environment is:

To exercise care in the selection and use of energy and raw materials.

To provide for environmental safety in our workplaces and communities.

To be prepared for emergencies and to act promptly and responsibly to protect people and the environment.

To ensure all products conform to safety, environmental and quality standards.

To reduce waste and embrace recycling in all our

SECTION III. LEED® SUMMARY

This credit summary is for Armstrong Luxury Vinyl Tile. Listed below are the credits in LEED for New Construction (LEED-NC) and LEED for Commercial Interiors (LEED-CI) that are applicable to Luxury Vinyl Tile.

INDOOR ENVIRONMENTAL QUALITY	Intent: Reduce the quantity of indoor air contaminants that are odorous, irritating and / or harmful to the comfort and well-being of installers and occupants.
EQ Credit 4.1: Low Emitting Materials: Adhesives and Sealants	Requirement: All adhesives and sealants used on the interior of the building shall comply with the requirements of the South Coast Air Quality Management District Rule #1168. Aerosol adhesives must meet the Green Seal Standard for Commercial Adhesives. Armstrong™ commercial adhesives meet the requirements set forth in the SCAQMD Rule #1168 (with the exception of S-89) and are considered by this standard a low-emitting adhesive.
EQ Credit 4.3: Low Emitting Materials, Carpet Systems (Alternative Credit for Resilient Flooring)	Intent: Reduce the quantity of indoor air contaminants that are odorous, irritating and/or harmful to the comfort and well-being of installers and occupants. Requirement: In an October 2006 credit interpretation ruling, USGBC approved FloorScore™ program certified hard surface flooring products as an alternative compliance path to LEED credit EQ4.3 Low-Emitting Materials: Carpet Systems. To achieve the LEED credit, a minimum of 25% of the finished floor area (both carpet and non-carpet areas) of a building must be comprised of non-carpet floor products, and all of these non-carpet floor products must be FloorScore certified. All Armstrong Resilient Flooring Products are independently tested and certified as low-emitting products under the FloorScore program.
