FLAT PANEL
SHAKER
DESIGN

Town&Country features 2-3/4" wide and 3/4" thick maple door frames that are assembled with five piece mortise and tenon construction joints, just like the craftsmanship found in fine furniture.

Town&Country's center panel is constructed of genuine solid maple hardwood, a quality that produces a consistently uniform look in color and graining patterns. In addition, its flat center panel features detailed vertical v-grooved beading that is further enhanced with glaze accents.

You can select from a wide variety of hardware, decorative glass and choose convenient accessories with additional storage space or time saving features. Specialty cabinets and decorative trim are also available to add the finishing touch to your kitchen.
