Solid & Veneered Wood Panels

Armstrong®
World Industries

Broaden Your Horizons

Curvy, Flat, Angled. **Design Away.**

Warm, natural wood ceilings in rectilinear solid and veneered wood panels create dramatic lines for ceilings and walls.

- Slats come in a variety of standard depths, widths, and lengths; custom sizes also available
- Panels can be installed in the ceiling, on the wall, or create ceiling-to-wall transitions
- Panels provide easy installation and design adaptability with notched backers, flat backers, dowels, or dowel and backer combinations
- Custom-curved application available with flexible backer
- Suspension system virtually disappears with backers that easily install on standard grid
- Create sleek visuals using integrated linear and downlighting solutions from our partners that are certified for fit and finish and are seismically tested

Your Design

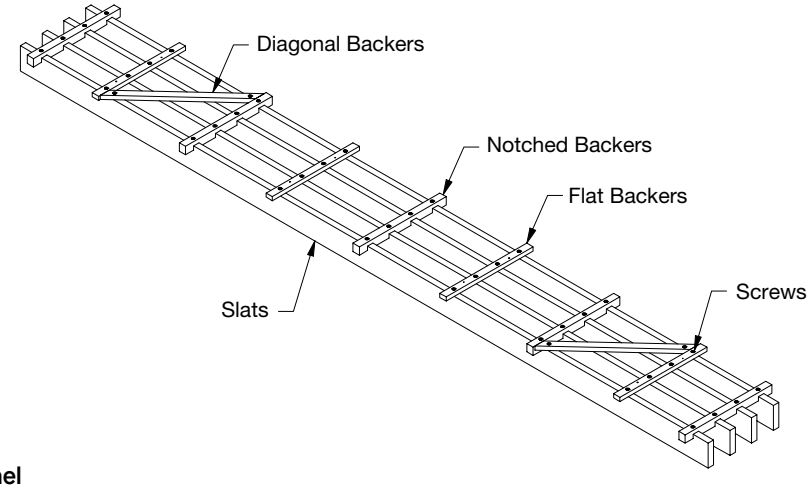

WoodWorks® Grille – Forté veneered 3-slat panels,
3/4" W × 3" H in 96" lengths in Quartered Sapele (NQS)

Bring occupant well-being to the forefront of your design with the inimitable beauty of solid and veneered wood. Wood interiors contribute to biophilic design, connecting us with nature and offering a natural warmth and comfort.

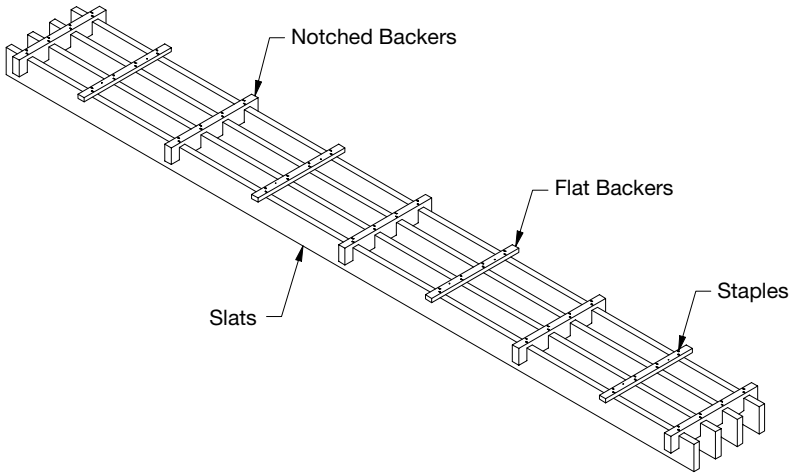

Fortified **Beauty**

Showcase natural beauty and strength with the structurally enhanced WoodWorks® Grille – Forté. Solid and veneered panels incorporate notched backers to improve slat alignment and minimize the naturally occurring bow of wood for consistent linear visuals from wall to wall.

SUSTAIN®

WoodWorks solid finishes are part of the Sustain portfolio and meet the most stringent industry sustainbility compliance standards today.

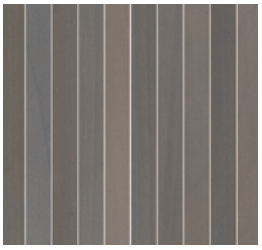

Tinted to replicate naturally occurring wood tones, curated WoodWorks® solid finishes enrich your space with unmistakable warmth and character.

Finish Ranges on Solid Poplar

Our tinted finishes allow the natural character of the poplar to shine through. The images here reflect the visual range that is likely within our product. Darkest to lightest tones may occur within a single installation due to the character of wood.

Veneer Cuts

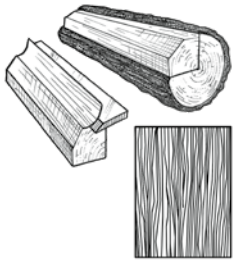

Different cuts of a log will yield different graining visuals. Choose your veneer to achieve your desired look.

Plain Sliced
Produces the well-known cathedral or loop-grain effect.

Quarter Sliced
Produces a striped, often straight-grain effect.

Rift Sliced
Produces a tight, linear grain along the entire length of the veneer.

Blur the **Line**

Let linear motion cascade downward from the ceiling to the walls with dramatic flowing lines and intersecting angles.

Accentuate **Geometrics**

Develop a bold look with congruous lines that create spatial harmony on a linear frame.

Wilsonart® For WoodWorks® ACGI

Create expansive, durable wood visuals with less variation for your large scale projects. When consistency of wood grain is vital, thermally fused laminate (TFL) finishes offer beautiful visuals in a scratch resistant finish; ideal for a variety of segments including healthcare, education, transportation, retail, and busy lobbies.
