

Armstrong Introduces Integrated Lighting for WoodWorks® Grille and WoodWorks® Linear Veneered Open Panels

LANCASTER, Pa. (June 18, 2026) – Armstrong World Industries, Inc., an Americas leader in the design and manufacture of innovative interior and exterior architectural applications, now offers pre-engineered linear lighting in collaboration with LightArt®, a lighting manufacturer Armstrong acquired with the 3form® acquisition, that connects to WoodWorks® Linear Veneered Open and WoodWorks® Grille panels, making lighting and ceiling installation seamless. More than beautiful aesthetics, Armstrong Integrated Lighting solutions eliminate guesswork and simplify lighting coordination at every stage, from specification through installation.

“Architects and contractors working with lighting agents too often have to coordinate ceilings and lighting from different manufacturers, leading to misaligned fixtures, surprises on the jobsite, and expensive field modifications that can disrupt timelines,” said Alex Kreitman, Head of Marketing at Armstrong World Industries. “Armstrong Integrated Lighting ensures customers see designs that look intentional, install faster, and perform exactly as planned.”

Engineers and designers at Armstrong and LightArt worked together on the design for a seamless, level fit with the WoodWorks Grille and WoodWorks Linear Veneered Open product lines. The Grille – Forté and Grille – Classics panels include factory-attached integration brackets to ensure precise alignment. The proprietary mounting on the fixture is vertically adjustable, ensuring the electrical contractor can align the face of the light fixture to be flush with the face of the panel. The linear fixtures designed by LightArt are available in 3 widths: ¾", 1-½", and 3-¾".

In the WoodWorks Linear Veneered Open system, the linear fixtures designed by LightArt are available in 3-¾" and 5-¼" widths. Fixtures match the width and depth of the planks and include factory-applied fleece for a flush, consistent visual. The lights snap directly onto the 12' HD linear carrier for faster, simpler installation.

Armstrong wood ceilings are covered by a five-year warranty for the ceiling and light system. To learn more, visit www.armstrong.com/integratedlighting.

About LightArt

Acquired by Armstrong World Industries with the 3form acquisition in 2024, LightArt is a lighting and design studio, headquartered in Seattle, WA with manufacturing in Salt Lake City, UT. From striking sculptural and geometric installations to performance-driven solutions that enhance both lighting and acoustics, the studio's diverse portfolio caters to a myriad of design preferences and practical needs. LightArt seeks to create a legacy of beauty, innovation, and sustainability, illuminating the path forward for the future of commercial lighting.

About Armstrong World Industries

Armstrong World Industries, Inc. (AWI) is an Americas leader in the design and manufacture of innovative interior and exterior architectural applications including ceilings, specialty walls and exterior metal solutions. For more than 165 years, Armstrong has delivered products and capabilities that enable architects, designers and contractors to transform building design and construction with elevated aesthetics, acoustics and sustainable attributes. With \$1.6 billion in revenue in 2025, AWI has approximately 4,000 employees and a manufacturing network of 24 facilities, plus seven facilities dedicated to its WAVE joint venture. In 2025 and 2026, Armstrong's extensive environmental efforts earned it the designation as one of [America's Greenest Companies by Newsweek](#).
